

# Balsillie Case Studies

The Balsillie Case Studies is a repository of true stories of contemporary technology governance challenges experienced by governmental, industrial and multilateral institutions. The dilemmas require innovative solutions to break away from the status quo.

The case studies are peer-reviewed packages consisting of an evidence-based governance dilemma within an industry and a teaching note with questions to facilitate governance exercise in classrooms and workshops. The cases are discussed in a storytelling format that is accessible to readers from a multidisciplinary background.

Prepared by experts from within a particular domain, the Balsillie Case Studies series nurtures critical thinking about safety, human rights, transparency, accountability and other governance innovation to the implementation of emerging technologies.

## Case study package

- Case Study and Teaching Note between 1500-4000 words.
- Case authors are remunerated \$1500 CAD for each package.
- Authors have their name on the byline of the case study.
- Great way to contribute to advanced research and education in a publication.
- Exciting opportunity to promote teaching and research expertise through the network of Balsillie School of International Affairs.

## Submit case study proposal

Writers with relevant field expertise and knowledge are requested to submit case study proposals using the [\*\*form in this link\*\*](#).

## Case proposals should contain

1. Proposed Case Study title
2. Rationale for case study
3. Contribution to graduate teaching programs
4. Research required? (If yes, please identify requirements for 25 hours of BSIA student research assistance)
5. Proposed completion date of case study and teaching note
